Trying to figure out the other product from our nuclear equation, I know nucleons are conserved, so if I have 238 nucleons on the left, I need 238 nucleons on the right. Well, I have four from my alpha particle, so I need 234 more. So 234 plus four gives me a

Download File PDF Balancing

total of 238 on the right, and so therefore nucleons are conserved here.
