The purpose of this course is to review neuroanatomy as it relates to rehabilitation for occupational and physical therapy practice. A variety of impairments as related to anatomical lesion sites will be discussed via the use of research studies and or case reports. Treatment interventions based on instructor ' s experience, evidence-based practice and participants ' suggestions will be offered as options for patient care.

The collaboration of a clinical neuropsychologist and a behavioral neurologist, *Clinical Neuroanatomy* expands upon similar texts by offering an exceptionally extensive review of higher cortical – behavioral functions and their anatomical substrates. While a major text for students and clinicians in neuropsychology, it is highly relevant for behavioral and traditional neurologists, neuropsychiatrists, and others who have an interest in exploring the mysteries of brain-behavior relationships.
