at your nearest transplant centre. The aim of the assessment is to build a detailed picture of your current health and to check for underlying problems that could make you unsuitable for a transplant. You'll have several tests, which may include blood tests, urine tests, blood pressure tests, lung and heart function tests, X-rays and scans.

~~Heart and Lung Transplant Unit — UHB~~

A heart-lung transplant is a procedure carried out to replace both heart and lungs in a single operation. Due to a shortage of suitable donors and due to the fact that both heart and lung have to be transplanted together, it is a rare procedure; only about a hundred such transplants are performed each year in the United States.
