A natural disaster takes place in populated areas of the world when lives may be lost, the property is severely damaged, and the economy is negatively affected. Natural disasters may include an asteroid collision with Earth, avalanche, landslide, blizzard, thunderstorm, earthquake, flood, gamma-ray burst (from space), volcano, heat wave, hurricane, solar flare, drought, tornado, tsunami, hail, and wildfire. It is not a natural disaster if it occurs in an unpopulated area and there is no loss ...

Natural disasters – such as earthquakes and floods – cause havoc when they strike. Developing countries experience the most disasters, and they can wipe out years of development and growth and use up vital resources. These classroom activities focus on flooding. A good range of activities with cross curricular links.

Natural Disasters | Teaching Resources
Natural disasters are naturally occurring events that cause destruction or severe weather changes. They happen all over the world depending on the location. Areas that are located mostly along the fault lines will experience earthquakes more often than others, while areas close to the ocean will likely experience a hurricane or flooding.

Natural Disasters Comprehension High School
A comprehension exercise in response to the earthquake and consequent tsunami in Japan. To be used along with research tasks or discussion. Introduce the lesson with a discussion about the events surrounding the earthquake and some BBC footage. The students need to be given the information without the questions to encourage them to read fully – this is not a scanning exercise.

ESL video lesson with an interactive quiz: Deep listening comprehension . Students will watch the video and answer questions related to natural disasters and their impact on the world.

Natural Disasters - English ESL video lesson
Summary. Students are introduced to our planet's structure and its dynamic system of natural forces through an examination of the natural hazards of earthquakes, volcanoes, landslides, tsunamis, floods and tornadoes, as well as avalanches, fires, hurricanes and thunderstorms. They see how these natural events become disasters when they impact people, and how engineers help to make people safe from them.
