Set the lens and camera to manual focusing. First, move the focus-method switch on the lens to the manual position. The setting is usually marked M or MF. Next, you need to set the camera to manual focusing by setting the Focus mode to MF.

How to Focus Manually on Your Nikon D5300 - dummies
When you choose the “Single Point” (Nikon) or “Manual AF Point” (Canon) AF-Area Mode, the camera only uses one focus point that you choose in your viewfinder to acquire focus. So if you move your focus point up/down/left/right, the camera will detect contrast only on that particular focus point, using either vertical or cross-type sensors (depending on which one you have chosen).
