The oil and gas industry is an obvious target of this attention because of its proneness to gas leaks as well as gas flaring, which releases mostly methane into the atmosphere.

Oil & Gas Methane Leaks Responsible For Rise in Emissions

Oil Spills and Gas Leaks highlights the complex nature of petroleum hydrocarbon fuel extraction methods, the unintended consequences when disasters occur, spill behavior, and environmental impact mitigation. This practical resource discusses engineering techniques; long-term biological and environmental effects; dealing with insurance claims, litigation, and legislation in overlapping jurisdictions, and much more.

Oil Spills and Gas Leaks: Environmental Response

The largest accidental oil spill in history began in the Gulf of Mexico on April 20, 2010, after a surge of natural gas blasted through a cement well cap that had recently been installed to seal a well drilled by the Deepwater Horizon oil platform. The gas traveled up the rig's riser to the platform, where it ignited, killing 11 workers and injuring 17.

The leak pumped out 12 times more oil than the Exxon Valdez spill of 1989. U.S. Coast Guard fire boats crews battle the blazing remnants of the offshore oil rig Deepwater Horizon on April 21, 2010...

We still don't know the full impacts of the BP oil spill

Oil Spills Facts The three largest oil spills in history are The Gulf War oil Spill, Lakeview Gusher #1, and the Deepwater Horizon Oil Spill (Oil and Gas IQ). Oil spills often result in both immediate and long-term environmental damage. Some of the environmental damage caused by an oil spill can last for decades after the spill occurs.

Oil Pipelines and Spills **Climate, Energy, and Society**

Spills can also involve refined petroleum products such as gasoline and their by-products; heavier fuels used by large ships, or spills can involve any oil refuse or waste oil. Oil spills at sea are worse than those that occur on land as they can spread for miles and produce a thin oil slick which can cover beaches with a thin coat of oil. Fortunately oil spills on land are more manageable because the area around the spill can be more easily contained. To date the largest oil spill in the ...
