Education and Research - Satellite Imagery Solutions | Planet

The distance from the Earth to the sun - 149,600,000 kilometers - is called 1 AU, or 1 Astronomical Unit. It is a unit well suited to measuring planetary distances. If a planet is located one-third the Earth's distance from the sun, what is the distance to that asteroid (using only 3 significant figures)?
0.333 AU

Daily Satellite Imagery and Insights | Planet

The data will look like an EKG showing the heart beat. Whenever a planet passes in front of its parent star as viewed from the spacecraft, a tiny pulse or beat is produced. From the repeated beats, we can detect and verify the existence of Earth-size planets and learn about the orbit and size of the planet. Video credit: NASA Ames and Dana Berry
