#### Speech and Language Developmental Milestones | NIDCD

Language development in humans is a process starting early in life. Infants start without knowing a language, yet by 10 months, babies can distinguish speech sounds and engage in babbling. Some research has shown that the earliest learning begins in utero when the fetus starts to recognize the sounds and speech patterns of its mother's voice and differentiate them from other sounds after birth.

#### Language development - Wikipedia

Speech and language development begins very early, before a child says his or her first word. Early adult – infant interactions in the forms of facial expressions, vocalizations, and physical contact trigger a domino effect of speech and language acquisition and progression. Children vary in their development of speech and language, but they follow a natural progression for mastering the ...
