Blood Sugar Spike: Causes, Symptoms, and What to Do

How sugar levels can be high, even when you haven't eaten anything If your sugar levels are HIGH — logic says, the solution is just simply to STOP EATING. This is a philosophy I see many type 2 diabetics adopt, particularly when the usual things to keep sugar levels in check, fail.

Why sugar levels are high despite NOT eating - BBC

Correcting high blood sugar levels with insulin If you take insulin, one way to reduce blood sugar is to inject insulin. However, be careful as insulin can take 4 hours or longer to be fully absorbed, so you need to make sure you take into account how much insulin you may already have in your body that is yet to be absorbed by the blood.
